

NIMASHA VITHANAGE

BUSINESS & DATA ANALYTICS PROFESSIONAL

PROFILE

I am a results-driven Data Analytics and Business Intelligence professional with hands-on experience in building dashboards, analyzing complex datasets, and supporting data-driven decision-making. Detail-oriented and technically proficient, with a strong ability to translate data into clear, actionable insights. Passionate about leveraging data to solve real-world problems and contribute to smarter, data-driven organizations.

WORK EXPERIENCE

Intern · Business Intelligence & Analytics

Sri Lanka Telecom - Head Office

09/2024 - 03/2025

Colombo, Sri Lanka

- Designed and developed interactive Power BI dashboards for an Employee Welfare Management Project, delivering actionable insights across attendance tracking, medical records, and demographic trend analysis.
- Collaborated cross-functionally with the development team to build a web application enabling seamless access to dashboards, significantly improving data accessibility and overall user experience.
- Authored comprehensive Business Requirements Documents (BRDs) and contributed as a Business Analyst for the Sri Lanka Telecom Travel Project, ensuring deliverables were aligned with organizational objectives and stakeholder expectations.

PROJECTS

- Predictive Analytics for Diabetes Readmissions · Data Mining | Group
- Retail Data Warehouse · Data Warehousing | Individual
- Mobile Recommendation System · Recommender Systems | Group
- Image Classifier · Deep Learning | Individual (Nanodegree)
- Titanic — Machine Learning from Disaster · Kaggle | Individual

RESEARCH EXPERIENCE

Predictive Models for Urban Air Quality Management using AI: Final Year Research Project · Published at ISDFS 2026 Conference

- Developed an AI-driven framework for predicting urban air pollution using real-world environmental datasets
- Performed spatial estimation using geospatial covariates and ensemble interpolation techniques
- Built high-resolution pollution maps to improve urban-level air quality monitoring
- Designed and implemented an interactive heatmap visualization system for city-wide pollution insights
- Integrated CEA dataset with spatial auxiliary data to enhance prediction accuracy

EDUCATION

Bachelor of Science (BSc) Honours in Information
Technology Specializing in Data Science

Sri Lanka Institute of Information Technology (SLIIT)

07/2022 - 07/2026
Malabe, Sri Lanka

SKILLS

Business Analysis & Analytics:

- Business requirements gathering, BRD documentation, stakeholder management
- Data analysis, predictive modelling, statistical analysis
- Dashboard design, data visualization, reporting & insights

Technical Skills:

- Python, SQL, Machine Learning, Deep Learning, Artificial Intelligence (AI)
- Power BI (Data Modelling, DAX, Data Integration), Geospatial Analysis
- Data Warehousing, ETL Pipelines, Microsoft Excel, PowerPoint, Word

Professional & Interpersonal Skills:

- Critical thinking, problem-solving, attention to detail
- Effective communication, team collaboration, cross-functional coordination
- Project management, task prioritization, time management

STRENGTHS

- Analytical Thinker Strong ability to break down complex data problems and translate findings into clear business insights.
- Detail-Oriented Meticulous approach to documentation, analysis, and delivering accurate, reliable results.
- Collaborative & Communicative Proven ability to work within cross-functional teams, bridging the gap between technical and business stakeholders.

LANGUAGES

- English (Full Professional)
- Sinhala (Professional)
